

Suggestions Made in January 24, 2022 Clarkston City Council Meeting

*I suggest the mayor provide in a February council meeting the listing of city commission positions and city council positions with terms expiring in 2022. I suggest in a June council meeting the mayor provide the listing of city commission members with expiring terms who do not wish to be reappointed. This should provide to city officials and city residents an awareness of upcoming commission appointments.*

*I suggest the city manager present in a February council meeting the result of the audit completed in December of the actual fund balance on 6/30/21 (\$196,000 was assumed for the current budget) and his recommendation for changes to the current capital project budget items.*

*I suggest the city manager present in a March council meeting his recommended priority for city streets needing repair and the number of sidewalk sections requiring repair and the estimated repair costs of both streets and sidewalks.*

*I suggest Sue Wylie present in a March council meeting the Planning Commission's updated status of the city's Capital Improvement Plan.*

*I suggest the city manager present in a March council meeting the updated cost of the East Washington Street sewer repair and any other known city sewer repair projects which have been postponed.*

*I suggest the city manager present in a March council meeting the status of the grant for Miller Road repair, any updated consideration for improving safety for those walking on the intended blacktop sidewalk and information on water levels and water health of upper and lower Mill Pond and Parke Lake after the Miller Road culvert is replaced.*

*I suggest the council's liaison to the Oakland County Drain Commission Interceptor Sewer project present any timing and estimated costs for Interceptor Sewer repairs applicable to Clarkston.*

*I suggest the city manager and treasurer present in an April council meeting the dates of the expiring bond issues, when elections would be required to replace the expiring millage with similar millage amounts and the estimated timing and amounts of dollars that could be provided for potential use for sidewalk and street repairs without an increase in cost to tax payers above the current millage levels.*

*I suggest the city manager present to council in a May meeting a listing of the capital improvement projects and costs which were discussed for the 2022-23 budget but could not be accommodated because of expected revenue constraints.*
