Project Approach and Work Plan

The City of the Village of Clarkston is seeking to conduct a salary study. The scope of the study will include the City Manager, City Clerk, Deputy Clerk, and City Treasurer positions.

The study will entail the following project activities:

1. An initial meeting will be scheduled with the City to discuss and conclude upon a number of up-front matters necessary for a successful outcome:
 - Review, and refine as needed, the project scope and approach.
 - Identify any particular areas of concern or challenge as they relate to compensation, including recruiting and retention experience in the City.
2. Collect and review information related to current City salary levels, benefits, job descriptions, and compensation policies and practices.
3. Develop an understanding of the job duties, responsibilities, and requirements of each position under study through a review of existing job descriptions and discussions with the City.
4. Conduct market analysis of targeted municipalities by gathering and analyzing comparative salary data for the jobs under study. Data will be compiled from the Michigan Municipal League database of municipal salaries.
5. Prepare a comparative market analysis and evaluate the City's current salary levels.
6. Develop and present a final project report, including the results of the market analysis and recommendations (e.g., updated salary ranges).

Resolution - Installation of Concrete Curbing to Address Erosion Issues

WHEREAS, during this summer's City-wide inventory of broken and heaved sidewalks, two areas of road-side erosion were identified: (1) the northwest corner of W. Washington and Holcomb and (2) the northeast corner of Robertson Court and Clarkston Road, and;

WHEREAS, City Engineer Hubbell, Roth and Clark subsequently reviewed the two sites, recommending that concrete curbing be installed at both locations to eliminate the risk of erosion and road asphalt failure, and;

WHEREAS, two subsequent onsite meetings with Orozco Construction - the vetted low-cost contractor for the 2024 concrete sidewalk project (bid comparison attached) - were held to review the recommendations of the City Engineer and meet with the adjacent homeowners, and;

WHEREAS, Orozco Construction submitted the two attached quotes for the proposed curbing, totaling \$22,670.00 and;

WHEREAS, to allow for unforeseen work, a 10% provision is recommended, bringing the total curbing funding request to \$24,937, and;

NOW THEREFORE, BE IT RESOLVED that the City of the Village of Clarkston hereby authorizes the City Manager to contract with Orozco Construction at a not-to-exceed cost of \$24,937.00 to install concrete curbing on W. Washington and Robertson Court to eliminate erosion and road asphalt degradation funded by the Professional & Contractual Services budget (401-901-805.001).

Estimate Date 11/08/2024

Item	Description	Unit Price	Quantity	Amount
Service	Concrete curb/gutter profile	80.00	121.00	9,680.00
Service	Concrete flatwork at 6 inch depth	9.00	350.00	3,150.00
<p><u>NOTES:</u> 6 inch concrete depth is standard approach depth in all cities. We chose to quote this as it will see garbage trucks and school buses. Our pricing for 6 inch depth concrete is 14.00 per square foot. We will form up and pour it for the price of asphalt. I can justify this discounted price point without sacrificing quality because the forms for the 121 feet of curbing profile will be used for the flatwork.</p> <p>This will be a 72 hour use mix design concrete. Fill in behind the curbs with topsoil and seed on top with straw on seed. This is new curb profile that will have a minimum of 11 inches of compacted stone. This curb profile will have #4 steel rebar running thru it.</p> <p>There is 350 sq ft of 6 inch concrete that will be poured and it will widen approx 72 feet of the road in most areas by 5 feet.</p> <p>The back of the curb will start approx 6 feet from the cyclone fence.</p> <p>We will also pour a ramp section to meet the homeowners walkway and finish it by recreating the stamped pattern to add some continuity to the connection point. This section will not be dyed to match. The curb will follow a path to connect at N Holcomb.</p> <p>This is a permanent concrete project that will accommodate any new asphalt topping in the future.</p>
